Cotton seed planters have been running a part of last week "gwine and comin" and considerable seed and considerable seed was planted.

The potato bug has made its appearance, and is ready to nip the plants in the bud. They come near going under the ground after them.

The signs the old people used to go by in planting, i. e. the whippoorwill songs, the poplars budding, the old twelve days, Good Friday, etc. will not do nowadays. The younger generation will have to hnnt others. Almost every kind and size of

Two nearly grown negro boys had a regular "fist and skull" fight about a week ago, I heard, and it was all about a mule track. Now that mule was perfectly innocent of it all. You may abuse the mule, accuse him of bad tricks, of kicking and refuse to view his hind legs unless you look through the flues of a boiler, but how could a mule avoid making a track? So don't blame him of particeps criminis in

Farmers are talking that they are going to try not to have to buy corn next year. I hope seasons will be favorable to them. But seasons are not all, nor is the lack of planting all. Sometimes it is the planting of too much unprofitable land, land that frogs or toads are in the swamps cannot make much, planting too singing their songs, and there is a close on it and working too poorly before and after planting, or depending too much on risky bottoms. Betworth the rent for planting. One thing I believe farmers are cursed with is too much land to work. It ought to be cut down to what can be worked profitably. It is not too late to turn about to redeem ourselves from buying corn. I do not know what is done with bought come as we get it. It must be soaked until nearly all is damaged. We buy by weight and if we dry it there is a loss of one half of a peck to the bushel. The it and see This is tists. At Jonesville where he was
